

AMIT KE CIRCUITS

Lift Selection Checklist

Prepared with Prashant - Lift Manufacturer

- [] Building type and number of floors are confirmed
- [] Expected daily traffic and peak load are estimated
- [] Passenger, service, hospital or goods use is identified
- [] Shaft dimensions and pit/headroom are checked
- [] Power supply and backup requirements are known
- [] Safety standards and approvals are considered
- [] Maintenance response expectations are defined
- [] Modernisation versus replacement has been compared

Starter resource. Validate building-specific requirements with the specialist.
